

Fairweather Science Cultural Sensitivity Training

Working Effectively in Arctic Alaska

A comprehensive training program designed to provide employees with an understanding of the land, indigenous peoples and their culture.

Fairweather Science, LLC, through years of experience and success in fostering relationships in communities across Arctic Alaska, has collaborated with Jenny Evans of **Rural Alaska First** to develop a comprehensive Cultural Sensitivity Training (FWS CST) program to assist organizations conducting work in Arctic Alaska. Working in the Arctic requires an understanding of the many cultures and traditional values of indigenous peoples. The FWS CST best practice program will provide your team with the following knowledge:

- An understanding of cultural issues and land access rights
- Respect for indigenous peoples
- An understanding of cultural differences
- Traditional values important to indigenous peoples

VIDEO

- 15-minute video
- Introduces important historical, environmental, cultural, and subsistence aspects of the North Slope
- Provides understanding of indigenous peoples and communities
- Provides valuable tools in preparation of working in the Arctic
- Material testing
- Certificate of course completion
- Direct billing
- Company branded videos provided upon request

VIDEO PRICING

- 1 to 9 employees: \$40/person
- 10 to 50 employees: \$30/person
- 50+ employees: \$20/person

CUSTOM WORKSHOPS

- Supplement the training video with an in-person training by FWS & Rural Alaska First personnel experienced in working with indigenous peoples in the Arctic
- Panel discussion with local indigenous leaders and subsistence hunters
- Each workshop is custom designed to meet organizations needs

MEETING FACILITATION

- FWS and Rural Alaska First will help facilitate meetings in communities across Alaska
- Provide meeting planning, venue, logistics and introductions to local leaders who are key to project success

WORK ROOM POSTERS

- Important reminders regarding interaction with indigenous peoples living in Arctic Alaska
